CERTIFIED ANTIBACTERIAL SURFACES

Certified production control under
very stringent health and quality
criteria for consumer health protection
and product quality performance

BlackLine

Black Line is an innovative product with a certified antibacterial surface, giving architects and designers the means to create functional interior and exterior projects subject to an increased demand for hygiene. With a black core and slim design, it combines aesthetics with significant technical advantages. Due to its exceptional durability, ease of maintenance, and complete water resistance, it is a preferable choice for heavy-duty private or public areas.

SUSTAINABILITY

Whether adorning tabletops or vertical surfaces, Black Line promises to elevate the visual appeal while staying true to sustainability principles.

Manufactured with lower water and energy consumption, it is an eco-friendly wood-based board with a negative carbon footprint.

56%

less Energy

72%

less Crude Oil

90%

less Water

Replacing core paper with cellulose fiber makes it possible to eliminate kraft paper from board production, saving nearly 90% of the water used in the paper manufacturing process. Moreover, direct fiber coating in pre-manufacturing process reduces resin consumption in comparison to standard HPL.

BlackLine*tops*

Black Line Tops are multipurpose compact boards offered in 8 contemporary wood, marble, and concrete designs.

The selection is suitable for indoor and outdoor use or places exposed to intense impact and moisture, like conservatory or patio furniture, pool cabinets, and dining tables in bars or restaurants.

Black Line looks unaltered throughout its entire lifespan.
The product doesn't require further edging, painting,
or coating with protective layers.
It is dimensionally stable, with mechanical and
thermal strength, withstands abrasion, resists water
and steam, and does not corrode.
